

ADJUSTABLE PERFORMANCE FEATURES

1. Trigger travel adjustment

Featuring a 1 screw trigger travel adjustment. Pull trigger down to access adjustment screw. Turn clockwise to increase travel, counter clockwise to decrease travel.

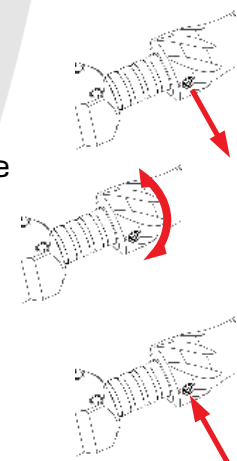

IMPORTANT:

When setting trigger travel, always handle the bow safely. If the trigger travel is too light, it is possible for the release to go off early.

2. Length adjustment

1. Loosen the length adjust set screw
2. Rotate the length adjust tube to lengthen/shorten the release
3. Tighten the length adjust set screw once the desired length is reached

ROTATION

Enables the barrel to rotate 360°; independent of the length adjustment.

Allows archer to secure release to their wrist with one hand.
