

To attach the Wrist Assist™ to your hand held release, loosen the screws securing the high strength cord. Pull out one end of the high strength cord and feed it through the wrist strap loop on your release, then feed the cord back through the clamp. Adjust to preferred length and tighten the clamping screws.

*TruFire Synapse not included

TRAPTAB 

Allows archer to secure release to their wrist with one hand.

CAUTION!
The Wrist Assist™ is NOT a replacement strap for a wrist style release.
